About the product	Made with Tajima Goriki, a rare sake rice variety that disappeared from cultivation for around 60 years before being revived by Nishiyama Shuzojo in 1999. Tajima Goriki is notoriously difficult to cultivate, but its distinctive character gives this sake remarkable depth and presence. It offers a gently sweet aroma, rich rice-driven umami, and a smooth, full-bodied texture, combining a delicate sweetness. Its complex flavors Id gradually on the palate and lead into a pleasant, lingering finish.
